**Product Code:** PHD B2 (in Black with European plug)

## Hotel *Safety*

## Cleaning Information

Your Northmace Hotel Safety Hairdryer should only be cleaned with a soft cloth, slightly moistened with water (moist but NOT wet). Do not use any cleaning products as even in diluted form they may damage the finish. Avoid the areas around the nozzle, air inlet, switches and the electrical connections. It is important that you remember to completely isolate your hairdryer, and if applicable holder, from the electricity supply before attempting to clean it. Then polish dry with a dry soft cloth.

Includes universal anti-theft security drawer/wall holder

- A** Special hotel safety / energy saving 'on-off' switch
- B** Safety thermostatic cut-out to help prevent over-heating
- C** 2 fan speeds with 3 heat settings for controlled drying
